

Monmouth
COLLEGE

Academic Schools

Benefits of School-Based Structure

Academic schools will provide students with greater opportunities for interdisciplinary collaboration, experiential learning, and real-world application, all while preserving the personalized, student-centered education that Monmouth College is known for.

The new academic structure reflects the College's commitment to high-quality liberal arts education while enhancing career pathways and learning experiences for students.

Stronger Advising and Mentorship

Students benefit from broader advising networks and more cohesive academic communities. Faculty collaboration enhances student support and career preparation.

Integrated Curriculum Design

Schools support the development of thematic, interdisciplinary, or skills-based learning pathways. This encourages students to make meaningful connections across fields of study.

Stronger Interdisciplinary Collaboration

Schools foster cross-disciplinary teaching, research, and curriculum development. The structure facilitates faculty collaboration on innovative programs and shared academic goals.

Enhanced Faculty Development and Support

Schools create natural communities for mentorship, peer coaching, and professional development. New and early-career faculty benefit from broader support networks, while experienced faculty can contribute to a culture of continuous improvement.
